

Warden Robotics

This is us!

ABOUT US

A team of students from Ostfalia UAS, developing an autonomous firefighting robot capable of patrouilling dynamic and chaotic outdoor sites 24/7. We aim to detect fires as soon as they happen, fighting it directly and automatically calling the fire department. Fires are thus detected earlier, keeping the damage of the fire and the extinguishing as small as possible.

OUR TEAM

Lucas Dehmel, 22 years old, plays the saxophone and reads manga. Responsible for team management as well as long and short term planning and mediation.

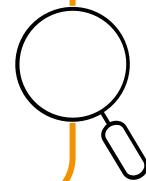

Lukas Bartenstein, 28 years old, likes traveling and cycling. Responsible for hardware construction, development of autonomous driving functions and team leading.

WHO ARE WE LOOKING FOR?

We need a person who has knowledge about the economical side of running a company. Since we both are on the technical side, the part of handling the numbers so we make profit would be your part.

We are looking for a person with the same drive and vibe as us. We work best with fun at work, so if you can have fun with us, too, then we can make up a good team.

YOUR ROLE

You will be responsible for the business part of our company, taking care of business plans, budget planning, marketing and distribution. You are the one who will be in charge of our spending and budgeting, helping our company being profitable.
